The Koran is the holy book of the Muslims and in my view it is not proper to relate it to science which is built on a framework of theories that are predictive rather than fundamental. However when reflecting or musing on its verses I have found certain resonances with the current scientific insights about our world Some such musings , reflections and resonances are proffered for the interested reader. These are my thoughts and should not be construed to be anything else. They are absolutely not intended to be explanations or explications of Quranic verses. I have written translations of some verses of the Holy Quran (translations are no substitute for the original) and then mentioned some scientific views about some subject.. Some readers like myself may find a resonance between them ,others may find none.
